

Mango REIX + RCA Partnership

Mango REIX™ is an asset-based market data curation and analytics platform used by some of the world's largest banks, institutional investors and commercial real estate professionals.

Unlike traditional aggregated data sources, Mango REIX allows you to capture and curate the data that is most relevant to your assets, strategies and business processes.

You can then compliment and cross reference your own data with valuable datasets from other industry experts.

In addition to Mango REIX's own 250K+ property records for institutional quality assets, users have access to an additional 350K+ proprietary transaction records available through data sharing partnerships.

Real Capital Analytics, Inc. (RCA) is the authority on the deals, the players and the trends that drive the commercial real estate investment markets, providing timely and reliable transaction data and intelligence on market pricing, capital flows and investment trends.

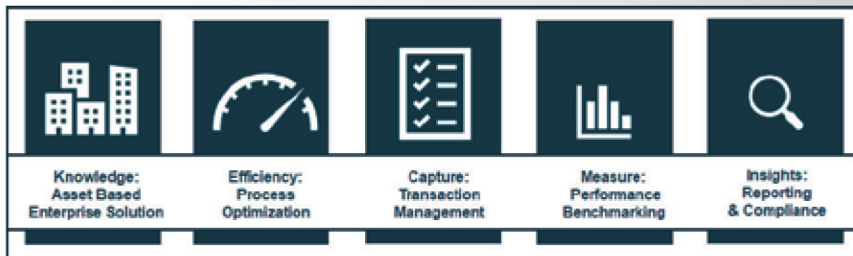

RCA's global database of commercial property transactions spans 172 countries, covering more than \$18 trillion of transactions linked to over 200,000 investor and lender profiles.

The most active investors, lenders, brokers and advisors depend on RCA's unique insight to formulate their strategies, source new opportunities, and execute their deals.

RCA is an investor and data sharing partner with Mango REIX.

Mango REIX is seamlessly integrated with RCA, giving users the ability to leverage RCA's transaction data directly in the Mango REIX platform via DI.

The partnership allows Mango REIX to deliver a robust enterprise cloud solution with flexible proprietary data rights to enable asset-based data curation, process optimization and performance measurement along with RCA's industry leading dataset on sales transactions, loan details, cap rates and capital trends.
